

Investment daredevil is rewarded

You'd swear Bomefa and Bolidt are family. An ample 45 years of admirable company history, [design products](#), worldwide distribution, high quality, cooperation with top architects, durability, from standard systems to tailor-made work, ISO certifications, project references of leading educational institutions, [museums](#), libraries and [offices](#): it is only a random pick from the similarities between the two multinationals. What Bolidt does with flooring, Bomefa does with functional furniture such as presentation constructions, storage furniture, large bookcases, canteen tables and built-in lightening.

Bomefa stands for balance between [quality](#), design and function. In April 2009 the newly built production hall and showroom were officially opened, the crown jewels of an explosion of developments in the areas product range, distribution, supporting machines and environment conservative processes. A true example for the entrepreneurs of Overijssel, to have the boldness to invest in extension and innovation in such critical financial times! Next to the new housing Bomefa has nowadays an impressive dealer network within Europe, took the polluting varnishing process out of the production method by replacing it for a powder coating machine and the CNC driven metal processing machine is a valuable addition as well. The shining, modern and user friendly centre of the new show room is the white [Bolidtop](#)® 525, chosen by Bomefa. A peaceful, orderly show room with class written all over it. Completely in line with the company philosophy, but also with the exhibited design products!

Family or not, Bomefa and Bolidt make a beautiful picture together!
