

Developments in the hatchery branch

In this special news issue for a change Bolidt is not showing the latest developed floor or newest customer. No, we just returned from a visit to one of Europe's leading chicken hatcheries. Already for the last decade the company Lagerwey in Lunteren is known for its leading position in the hatchery branch with up-to-date finest technologies for hatching!

The hatchery is used by customers all over the world to witness pure expertise from Dutch soil. At the Lagerwey facility a dazzling 1.8 million eggs a week are hatched. Besides superb equipment, machines and information technology the floor [Bolidtop® 700](#) is in excellent shape.

Technical Manager Mr. Bert Lambalgen says: "Of course, people first focus on breeding installations and machines. However, one should not underestimate the importance of a solid basis to work on. Bolidt installed their Bolidtop® 700 system back in '99' We are very happy with the condition of the floor today.

At Lagerwey we clean the floors with aggressive cleaning detergents on a daily basis. The Bolidtop® 700 is the ideal floor solution for easy cleaning, yet slightly non slip.

Bolidt is very proud of its craftsmanship and the quality materials which are the basis for one of the strongest industrial flooring systems in the [world-wide food processing industry](#). With the current developments in the hatchery branch, Bolidt is of course aiming to serve new satisfied customers. On a world wide basis, of course...
